EXPERIENCE

Software Development Engineer Intern

Microsoft India (R&D) Pvt. Ltd.

📅 May 2024 – July 2024 📍 Hyderabad

- Collaborated with M365’s Personal Information Management (PIM) team on the development of the Live Perona Card (LPC) for OWA/Monarch to enhance user experience.
- Working with various APIs to fetch data from the database and display the inferred information about the user on the LPC.
- Doing source attribution for inferred data to provide users with the origin of the displayed data.
- Learning and applying debugging and testing techniques to identify and resolve issues in both frontend and backend components.
- **Technologies Used:**
 1. React.js, Typescript to create dynamic UI components for the LPC
 2. C# and .NET to handle data processing and API integrations.

PROJECTS

RideWallet - Website to digitalize the college bus pass system

Team Project (4 members)

📅 March 2024 -Present

- Engineered a digital bus pass system with QR scanning for admin use.
- **Technologies Used:**
 1. Next.js, Tailwind CSS
 2. Clerk for Google Authentication
 3. Vercel for deploying the website
- **My role:**
 1. Designed the structure and layout of the website.
 2. Developed the frontend
 3. Deployed the website

Portfolio Website

Personal Project

📅 April 2024

- Developed a personal portfolio to showcase my skills in Next.js and Tailwind CSS.
- Built for learning, demonstrating my ability to design, implement, and deploy responsive web applications.
- Link to [PORTFOLIO](#)
